Certifications

Python Functions, Files and Dictionaries
Coursera

Data structures and algorithms
GeeksforGeeks

Internship

AI Enabled Fintech B2B Invoice Management Application

This is a 3 week summer internship where i worked on AI, web and mysql database at first we worked on machine learning where it predicts the dates and with that data and build a web application which shows the predicted payment dates in the application.

Analyst
done 10 months intership in the field of analyst where i am working on mysql and snowflake in highradius company

Projects

AWS
AWS lambda where i used this to collect all the files in the S3 bucket and copy those to a csv file and used stepfunction to trigger the lambda
i have knowledge on AWS Redshift, Dynamodb, athena

Shopify app store data analysis
done analysis of this data using tableau prep and excel
#Where the analized data is shown in a beautiful dashboard with images in it linked with hyperlinks used pivot in analizing cleaned data using tableau

Mouse using hand gestures
In this I used some libraries like CV2, mouse etc to create this where it detects hand and used as a mouse.
created by python

Quizmanagement
this is a webpage created for quiz with Django, html and Css

Portfolio
This is my portfolio website
#created by html, CSS and a little java script to create this website, Hosted it on Netlify.

Robotic Arm
#We made a project on robotic arm which works with micro servo motors. We made this project so that we can do our work by controlling from different places

Web scrapping
#Scrapping Web pages and getting the information from those pages
used python libraries to do this

Participations/Achievements

Artificial intelligence workshop in IIT Ropar
Participant

Joy of giving conducted by LPU NSS
30hr social service
